

Year 4 Topic - week beginning 13th July 2020

It is the last week of Year 4 - well done, you did it!

Thank you for all the amazing work you have sent through, we have loved seeing it.

Have a brilliant summer and a well-deserved rest.

Science:

This week, we would like you to create your own animal and a habitat for it to live in!

Your animal could be completely made up or a mixture of lots of different animals. You could also mix up different habitats. For example, you might have a reptile creature with scaly skin, that has wings and gills so that it can fly and swim under water! It could live in a swamp in the middle of a desert.

Can you draw your animal and habitat and label and describe its features?

PSHE:

Write a factfile all about you to show your new teacher in September.

Tell your teacher what you like and don't like. Who are your friends? What are your favourite subjects? Are there any strange facts about you that you would like your new teacher to know?!

Geography:

If you could travel anywhere in the world, where would you go?

Can you describe the place you would go to and why you chose there?

Think about the food, culture, language, where it is in the world and anything that makes it special.

Art:

Draw a picture that summarises your experiences over the last few months. It could be something that you have done, the way that you have felt or a picture of the people you have spent time with.

PE:

Describe your top 2 Sports Day races! Why do you like them?

We would also like you to create your own race. What would you use? How can you make it different?

You may want to have a go at recreating the races with another member of your household!
